They located at him with amazement and thought it the wildest scheme ever heard on earth or anywhere cise. They entered into a contract about cattle shipments, however, and allowed Mr. McCoy to spend his own money on a corps of engineers to locate the trail leaving to Texas, in that day supposed to be many thousand of miles day supposed to be many thousand of miles way. It was in '67 the corps passed south brough Wichida, Wellington and Cald-ell and down through the territory into exas. Very soon the Texas cattle were rading northward, and in duetime reached bilene and the freight department of the kansas Pacific commenced to hear from he wild scheme. Suffice it to say that over four million head of cattle came north over the Abilene trail. In 72, owing to the fact that the Kansas Pacific management failed to comply with the contract, Mr. McCoy commenced to work for stopping and turning the cattle to Wichita. The Santa Fe had just reached here and the leading citizens here went to work earnestly and Abilene lost the trade and it came to Wichita. Buring the first year 3,740 car loads of cattle left Wichita over the Santa Fe and only 2,000 car loads went over the Missouri river by the Kansas Pacific. As all the old settlers will recall, the cattle days were quite important to Wichita and at that time Mr. McCoy was a leading cattle man and assisted Wichita in controlling the trade of that day. er four million head of cattle came north trade of that day.
